PROJECT REPORT · SEPTEMBER 2026

Jubilee Sales *Website* — where it stands

The website is finished and every part of it works. What it does not have yet is your material: photographs, real project details, and the legal numbers. This report sets out what has been built and exactly what we need from you.

PART ONE

What the website has

For visitors

- Home page with a large photograph and a day / night switch
- All projects, filterable by type, city and status
- A page for each project — photographs, price, specification, floor plans, map
- Availability — every flat shown floor by floor, sold and unsold
- Blog with photographs inside the writing
- About and Contact pages, with enquiry forms throughout

For your team

- Add and edit projects yourself
- Upload photographs and video, and reorder them
- Mark flats available, on hold or sold
- Write blog posts and place images in them
- Every enquiry in one inbox, downloadable to Excel
- No developer needed for any of it

Enquiries from anywhere on the site — the home page, a project page, the availability plan or the contact page — all arrive in the same inbox, with the project and flat the person was looking at.

PART TWO

What we need from you

In the order it holds things up. The first list is what stops the site going live at all.

MUST HAVE the site cannot go live without these

01 Logo files, and confirmation of the brand red
02 Company details — phone, WhatsApp, email, office address and hours
03 Two hero photographs — one by day, one by night
04 One main photograph for each of the six projects
05 Real project details — name, status, description, price, configurations
06 Flat inventory — towers, floors, sizes, prices, and what is sold
07 RERA numbers, disclaimer, privacy policy and form consent wording
08 Who receives enquiries, and email addresses for dashboard logins
09 Domain name and access to it
10 Who approves content, and the launch date you are aiming for

LAUNCH WEEK needed before we announce it

- Three to five gallery photographs for each project
- Floor plan PDFs
- Leadership names, roles and portraits
- Owner testimonials, with their permission to publish
- Social media links and analytics access
- Two or three blog posts to launch with

CAN FOLLOW add after go-live

- Show-apartment walkthrough video
- Awards, certifications and banking partners
- Connection to an existing CRM
- Google Maps key and advertising tags

PART THREE

How the site behaves until then

Nothing on the site is invented or filled with stock material. Where your content is missing, the site says so plainly:

- Every empty picture frame names the photograph it needs, and the size we need it at.
- Testimonials stay hidden until you supply real, attributed quotes.
- RERA lines say the number is available on request, until you give us one.
- Leadership shows a placeholder rather than an invented person.

IN SHORT

This means the site is safe to show inside the company today, and safe to put in front of a buyer as soon as the ten items in the first list are in.

Next step: send the ten items in the first list, and we will put the site in front of you with your own material in it.

THE ASK, COUNTED
